Subject: John Kerwin?

Julia checked his references..said that they were all great.
Do you want to talk to Gene about this option?
I spoke to him briefly about Scott….now that he's a hockey-buddy I am sure that he does not want to be the bad-guy and actually manage the situation/business properly. He said that we could keep him as the stock-boy…blah blah blah… if we get another tech. I do not see the value…he basically can't touch any medication that is in any active process…that includes labeling!! We already have Saulo and Chris to do all the whse/prep work……
My opinion is that he needs to go. When do you want to bring John in?
